## MACHINERY IN MOTION FOR SELECTIVE DRAFT

### CITY BOARD OF EQUALIZATION BUSY

**Hoists Assessments of Over a Score  
of Brainerd Business Men, Lowers  
Three Raises Made**

**Biggest Individual Raise was of Senator George  
H. Gardner, Whose Moneys and  
Credits Raised \$5,000**

The city board of equalization composed of Mayor R. A. Belse, Aldermen F. M. Koop and Jacob Strickler, assisted by Assessor Hugo Schwartzkopf, has completed its work.

But three raises made were lowered by the board when the parties objecting appeared on Friday afternoon and made their objections.

The largest raise was made in the case of George H. Gardner whose credits were hoisted \$5,000. The franchise of the Brainerd Gas & Electric Co. was assessed at \$5,000.

The figures in detail follow:

John Larson, raised \$1000, cut to	\$200
Ole Benson, raised \$200, cut to	100
Tanner Mill Co., raised \$1000, cut to	500
Skaug Drug Co., raised on fixtures	200
H. P. Dunn, raised on fixtures	500
H. F. Michael raised on fixtures	200
Geo. F. Murphy, raised on fixtures	300
J. F. Murphy & Co., raised on stock	1000
S. Vanek, raised on stock	200
C. L. Burnett, raised on fixtures	200
C. L. Burnett, raised on book accounts	300
H. W. Congdon, raised on stock	200
Dr. H. E. Murphy, raised on fixtures	100
W. A. Eastling, raised on auto.	300
Ed Sargent, raised on pop factory	200
Singer Sewing Machine Co. raised stock	200
M. Arnold, raised credits	1000
K. S. Bredenberg, raised book accounts	400
Marle Canan, raised credits	150
Carlson & Son, raised credits	507
Dr. A. K. Cohen, raised credits	297
F. C. Cook, raised credits	210
E. W. Dunn, raised credits	800
Geo. H. Gardner, raised credits	5000
Koop Mercantile Co., raised credits	2000
K. W. Lagerquist, raised credits	200
Fred Luken, raised credits	400
Geo. W. Moody, raised credits	200
Jens Molstad, raised credits	200
Geo. F. Murphy, raised credits	1000
Toger Peterson, raised credits	400
Dr. D. E. Nelson, raised credits	200
O. C. Skaug, raised credits	300
Jacob Kaupp, raised stock	200
Brainerd Gas & Electric Co., on franchise	5000

### TWENTY HURT IN AUTO ACCIDENT AT WINONA

Winona, Minn., July 2.—Twenty persons were injured, ten seriously, here when a high powered racing car, driven by King Kelley, Chicago millionaire sportsman, crashed through a fence and into a crowd of spectators at a race program at the Tri-County fair grounds.

Ten of the injured were treated at the local hospital. All will recover. The machine, rounding a bend in the track at terrific speed, blew a right front tire and plunged through a frail fence behind which spectators were crowded several rows deep. It continued on straight through the crowd and stopped only when it had reached a knoll behind the crowd.

In an instant the crowd had streamed out on the track and many narrowly escaped being struck by the racing cars. The police got control and stopped the racers before further injury resulted.

### Wine and Beer up to President for Decision

(By United Press)

Washington, July 2.—The senate agricultural committee has decided to put up to President Wilson the decision as to whether wines and beer shall be produced after whiskey distillation has been stopped.

### Wednesday to be America Day in Paris

(By United Press)

Paris, July 2.—Wednesday is to be America day in Paris and the Sammies are to march through the streets and be shown the best time ever.

### Assassination is Ascribed to German Intrigue

(By United Press)

Petrograd, July 2.—Russia's first offensive under the new regime is continuing vigorously, while the propaganda of the central powers here is becoming more unbearable. The assassination of Russian General Nogin is ascribed to German scheming.

### Russian Offensive Fully Under Way

(By United Press)

Petrograd, July 2.—The Russian offensive is now fully under way and in 24 hours fighting 8,564 prisoners have been taken. The great artillery preparations are noticeable from the roaring along the Galician front.

The town of Kominkhy has been captured by the Russians and fighting is being pressed over the 25 miles front.

### Prohibit Night Work Women in Laundries

(By United Press)

Madison, July 2.—The state industrial commission has issued an order prohibiting all night work for women in manufacturers laundries in Wisconsin.

### CHICAGO BANK IS CLOSED

Federal Authorities Take Charge of Institution.

Chicago, July 2.—Graham & Sons' bank, the oldest and largest private bank in the city, is in the hands of the federal authorities.

The Chicago Title and Trust company was appointed receivers after the bank's officers had voluntarily closed its doors.

The bank is understood to have about \$4,000,000 in deposits, divided among 27,000 depositors. Its assets are estimated at \$6,000,000 and liabilities at \$5,750,000. Its officials express confidence in its ability to meet its obligations in full.

WILLIAM H. MOODY.

Former Associate Justice  
of Supreme Court is Dead.

### FORMER JUSTICE IS DEAD

William H. Moody Was Cabinet Member and Associate Justice.

Haverhill, Mass., July 2.—William H. Moody, former associate justice of the United States supreme court, died at his home here. He retired from the bench seven years ago because of ill health.

He was secretary of the navy and attorney general in the cabinet of President Roosevelt and was appointed to the supreme bench in December 1906.

### Exchange Philippines for South Sea Island

Tokio, July 2.—The suggestion was made in parliament that Japan and America exchange the Philippines for the South Sea Islands which were seized by Japan from Germany.

### Place Clothing Under Control

Washington, July 2.—The senate amends the food bill to include cotton products which would place clothing under control.

### Starts Huge Labor Singling Out Men for Army Service

(By United Press)

Washington, July 2.—President Wilson has set into motion the gigantic machinery of selective draft and by his proclamation the president has started the great amount of labor in the task of singling out men for the army, only a small group being exempted from bearing arms in the present war, while all others must appear before the tribunals and accordance to the evidence will be discharged or drafted into the army. Registration cards are to be numbered serially from one up and the numbers posted, a copy to be sent to Washington simultaneously. After this is completed the drawing will take place in Washington and the states will be assigned their quotas, the quotas in the counties and cities being determined by the governors on the basis of population after which the numbers will be drawn in Washington. Each man of the number drawn will strike men of that number in every precinct in the nation and the men will be summoned for a physical examination, the physician who is a member of the board being expected to make the examination in the presence of a fellow member of the same board. If the man under examination is pronounced unfit another physician will be called in and he will make an examination in ignorance of the first report, and members of the board are barred from passing on the case of relatives.

The claims of men who ask exemption must be supported by affidavit made by the man claiming the exemption, and the claim of having dependents must be supported with affidavit that the income for the support is mainly derived from the fruits of their labor and not an income from property. And in addition to this another affidavit from the dependent must be furnished affirming their dependency and a third affidavit from the head of a family stating that the affidavits before mentioned are true, and either absolute or conditional discharge may be granted. When in the opinion of the board that a loss to an industry outweighs the

DR. ROBERT J. ALEY.

Head of N. E. A., Which Meets  
at Portland, Ore., July 7 to 14.

Questions of the greatest importance to all parents of children of school age and to the young people themselves will be discussed at the National Educational association at Portland, Ore., July 7 to 14. President Robert J. Aley says war work for children will receive considerable attention.

gain to the military establishment then the discharge may be issued.

Claims of exemption may be made by relatives, employers, or any man for a man in whom they are interested.

The previous forecasts of the regulations stand.

### Liquor Advertising Barred 45 Counties in All Newspapers

(By United Press)

St. Paul, July 2.—Liquor advertising in 45 counties of Minnesota is barred by the postal bone dry law beginning July 1, and Secretary of State Schmahl has been so notified.

### CALL OF AMERICA IS ANSWERED

The American Red Cross War Finance Committee, Washington, D. C.  
June 26, 1917.

The Mayor,  
Brainerd, Minn.

My Dear Sir:—The call of America for a Red Cross War Fund in her greatest crisis has been answered. Men and women of every nationality and station of life have contributed alike to its success. The War Council cannot directly express appreciation to every person who has rendered service in this great movement, but the success of the campaign would be incomplete were we to fail to convey personally our regard for the splendid service rendered by the men and women of Brainerd.

The tangible results accruing from this campaign, great as they are, will be less than the intangible benefits, just as the material gifts are small in comparison with the giving of self. It is the spirit of an army that wins battles, and the spirit of our citizens is what will determine our country's future.

Again assuring you of our appreciation, we are,  
Very cordially yours,  
HAROLD BRADDOCK,  
Secretary for War Council.

### Russian Attack in Galicia Only Beginning

(By United Press)

Washington, July 2.—The Russian attack in Galicia is only the beginning of the general offensive, the state department having been informed that the general attack against the Teutons would begin on July 10.

### Notify all Ships be Prepared for Gov't Requisition

(By United Press)

Washington, July 2.—Secretary Redfield is expected shortly to notify all ship owners to be prepared for government requisition of their vessels.

### Pekin Proclaims Martial Law Through Empire

(By United Press)

Changhai July 2.—Hsun Tung, former emperor of China, announces his succession to the throne and again assumes control of the government. Pekin proclaims martial law throughout the empire and President Li Huan Huang has been ordered to relinquish all authority.

### THE CHINESE MONARCHS DEPOSE LI HUAN HUANG

Washington, July 2.—Chinese monarchs by now have accomplished a coup d'etat deposing Li Huan Huang, the state department is informed.

### STREET CAR PLUNGES INTO NIAGARA RIVER

Niagara Falls, N. Y., July 2.—A belt line car on the Great Gorge route left the rails, plunged down a twenty-foot embankment and turned over in ten feet of water on the edge of the Whirlpool rapids.

Ten persons are known to be dead, two known to have been on the car have not been seen since the accident and probably are dead, and about twenty others are missing and more than a score injured.

A washout, due to heavy rains, was the cause of the disaster, which occurred just below the cantilever bridge and sixty feet below the point where the smooth water of the upper reaches of the Niagara river break into the turbulent waters of the Whirlpool rapids.

Ten bodies were recovered from the car when it was taken from the river by a derrick.

Officials of the Gorge route said the fare register indicated the car was carrying about forty persons.

The car had all but completed the circuit of the gorge, having crossed from the Canadian side of the river on the trolley bridge at Lewiston. There were more than fifty passengers on board, according to general estimates.

### GREAT OPPOSITION TO WAR

Trouble Feared at Demonstrations at Buenos Ayres.

Buenos Ayres, July 2.—Trouble is feared here at a demonstration against Argentina entering the war and a protest against the high cost of living.

Protests are posted all over the downtown section.

Argentina is momentarily expected to announce severance of relations with Germany, due to destruction of Argentina shipping in the submarine zone and impossibility of obtaining a guarantee for future protection of the nation's merchant marine.

### First Photograph of General Pershing and Staff in England

Front row, left to right—Major James G. Harbord, chief of staff; Major-General John J. Pershing, commander; Colonel Benjamin Alvord, adjutant general; Colonel Andrew W. Brewster, inspector general.

Back row, left to right—Colonel Merritt W. Ireland, medical corps; Colonel Harry Taylor, chief engineer officer; Major Townsend F. Dodd, aviation corps; Colonel Daniel E. McCarthy, quartermaster; Lieutenant-

Colonel Walter A. Bethel, judge advocate; Colonel Edgar Russell, chief signal officer; Lieutenant-Colonel Clarence C. Williams, chief ordnance officer; Captain Nelson E. Margetts, aid-de-camp.

This is the first photograph of General John J. Pershing's staff to reach the United States after his arrival in England. The photograph was taken the day he got off the steamer.

## MUM'S THE WORD FOR MILITARY MEN

Many Have Been Sent to Oblivion For Talking Too Much.

## DOESN'T WORK IN POLITICS

The Man With the Gift of Gab, the Vocabulary and the Brass Band Is the Man Who Establishes a Reputation. House and Senate Often Ignore Requests For Conferences.

By ARTHUR W. DUNN.

Washington, June 30.—[Special.]—Many a man ruins his career by talking too much. Many a man might have had an opportunity to distinguish himself if he had not been quite so free in his conversation.

This refers particularly to army and navy officers. There are prominent officers of both branches of the service who will get no chance in this war because they have talked too much at one time or another.

A member of the administration told me that the man with "publicity" was not considered good material in the great conflict which we have before us. Possibly if one cared to investigate closely he could give the names of quite a number of distinguished officers who have been placed in out of the way places, and it will be found that they have shown a tendency to talk. Mum's the word in the army and navy these days.

### Doesn't Work in Politics.

This silence business does not work in politics. The man without a brass band does not get far. It is the fellow with a voice and a vocabulary and who is not afraid of using both early and often that gets to the front in politics. Some of the most distinguished people in public life at the present time are men who have been free talkers, who have shown a gift of gab and who have hunted reputations with plenty of noise.

### Ignoring the Senate.

Sometimes one house or the other ignores requests for a conference, but it generally happens when there has been a failure to agree on the matter in dispute. More than three weeks ago the senate passed a house bill with amendments and asked for a conference, but the time has slipped by without any response on the part of the house. This ignoring of the senate shows that the men in charge of affairs in the house were resentful of the amendments made and showed their resentment in this manner. The bill in this case was highly important. It was designed to curb the speculation in food which has been going on for so long and which has been so severely condemned.

### Conversation Was Important.

Senator Thomas of Colorado was speaking in the senate, and nearly all the other senators were in groups holding earnest conversations, causing the utmost confusion in the senate, to which Senator La Follette of Wisconsin called attention.

"I am speaking with some difficulty," remarked Thomas, "but I hesitate to be so rude as to object to the conversations which are audible all around me and which, of course, must be extremely important or they would not be conducted on the floor of the senate."

### Hardy's Mistake.

Congressman Hardy of Texas confessed to a mistake which is made by many new men when they first come to congress and are fooled by the names of committees. "In my innocent ignorance," said Hardy, "when I first came here I thought the committee on railways and canals would be an important committee, but I found

at it did not have anything to do and could not get anything to do."

The interstate commerce committee takes everything relating to railroads and other committees take the bills which relate to canals, and this committee has never done anything.

### Meat Is Food.

"Why didn't you put everybody in this bill?" asked Congressman King of Illinois during the discussion of the food control bill. "Why didn't you put in the packers?"

"The packers are in," responded Goodwin of Arkansas.

"Does it cover meat?" asked King. "Of course," replied Thompson of Oklahoma. "It covers feed and food of course it covers meat. Isn't meat food?"

"Not nowadays," interjected Rucker of Missouri.

"Will the license extend to the man from whom I buy the chuck steak I get?" inquired Campbell of Kansas and when informed that it did not he plaintively asked how he was protected, "because the chuck steak man gets my money."

### Emerson's Advice.

There had been long winded speeches on the food control bill, and Congressman Emerson of Ohio took a hand.

"Now, what must congress do?" he asked. "First cut out this hot air festival and get down to business and mix brains with legislation. The trouble with this house is that there is too much of a Marathon going on to see which member can put the most words into the Congressional Record. If we could abolish that publication we would transact business in half the time and save a lot of money."

## TO STUDY SCHOOL SYSTEM

Minnesota Governor Creates Special Commission.

St. Paul, June 29.—Governor J. A. A. Burnquist has appointed a special commission on state school aid, to investigate and make recommendations for revision of the system. A plan to be reported to the next legislature, so it can be adopted before the school aid appropriations are made, is the object. The commission is a combination of teachers and citizens with experience in public affairs.

The commission, the governor announces, will be asked to investigate the whole subject of school aid, including the problems of nonresident pupils, types of schools, enrollment per teacher and the advisability of placing the aid system on a permanent tax rate basis.

## DAM BELIEVED DYNAMITED

Water Destroys Crops on Thousands of Acres.

Baker, Ore., June 29.—Carrying destruction in its path, millions of gallons of water from a reservoir high in the Elkhorn mountains, fifteen miles west of Haines, swept through the village of Rock Creek and destroyed crops on thousands of acres.

So far as known no lives were lost. Several families had narrow escapes. Officials of the company owning the reservoir declared they believed that the dam had been dynamited and they caused the arrest of a discharged workman named Gray. He protested innocence.

Among British birds the cuckoo lays the smallest egg in proportion to its size and the guillemot the largest egg. Though the latter bird is only about the size of the raven, its eggs are nearly five inches in length.

### Kills Two and Himself.

Covington, Ky., July 2.—Edward Wright, thirty-eight years old, shot and killed his wife and his sister-in-law, then committed suicide here. The shooting was due, relatives say, to the filing of a divorce suit by Mrs. Wright.

### Former Senator Chase Dies.

Providence, R. I., July 2.—Jonathan Chase, member of the United States senate from Rhode Island from 1855 to 1889, died here after a long illness. He was eighty-eight years old.

## You Never Saw a Better Saw Saw Than an Atkins Silver Steel Saw

## DENIES FREIGHT RATE INCREASE

Commission Finds Railways Are Prosperous.

## MAY ADVANCE CLASS TARIFFS

Roads in Eastern District Will Secure Higher Schedules—Lines Asked for Horizontal Increase of Fifteen Per Cent.

Washington, June 30.—The interstate commerce commission denied the plea of the railroads of the United States for a horizontal increase of 15 per cent in freight rates.

In its decision the commission indicated its willingness to increase class rates in the Eastern district approximately 14 per cent.

Since about one-fourth of the freight handled is moved under class rates the decision virtually allows the Eastern lines about 4 per cent increase in gross freight revenue. Increases sought in rates on coal, coke and iron ore will be granted.

The commission found, as a result of extended hearings, that the carriers generally show a substantial and financial prosperity and that they have ample resources with which to conduct transportation.

Little sympathy was given the arguments of the roads that they were victims of war prices, the commission holding that the carriers have profited by the mobilization of troops.

The commission suspended the proposed tariffs until Oct. 25, but it indicated that no rehearing of the case will be of value at this time and suggested cancellation of the tariffs.

### Gloomy Forecasts Not Borne Out.

The commission finds that the gloomy forecasts of jeopardized incomes, seen by railroad officials early in 1917, have not been borne out by the figures available for later months. The proceedings were brought in March, when the returns from February were just being made. February was one of the worst months in railroad history.

The subsequent months have shown increasing revenues, while expenses have, in many cases, failed to mount to the extent the carriers' officials feared.

The decision points out that the car-

riers' comparisons have been made largely with those of 1916, which was the banner year in railroad earnings, and adds that the 1917 income might be considerably diminished without necessarily indicating a danger point in earnings.

Commissioner Harlan in a concurring statement declared that should the next few months show that the railroad men's fears were well founded the commission would be ready to grant relief. He also made a plea for better equipment and service.

## WHEAT HARVEST IS BEGUN

Government Bureaus Arrange for Labor in Various States.

Washington, June 29.—Harvesting of the winter wheat crop is well under way in all Southern states and good progress is being made in central districts with oats and winter wheat. The winter wheat harvest is about ten days late in Kansas. The department of agriculture and labor has arranged to have laborers on the farms where the crop is ready to be harvested.

## WOOD SENDS REPORT TO WAR DEPARTMENT

St. Paul, June 29.—Adjutant General Fred B. Wood officially notified Governor Burnquist that the return from his office demanded by the war department have been forwarded to Washington, with a draft covering the balance of federal funds in his possession, and that he believed the reports will be found to meet all requirements.

The conference was brief and resulted only in a telegram being sent by General Wood at the governor's suggestion to furnish the same information to Captain W. F. Rhinow, the governor's military secretary, now in Washington, to reinstate the Minnesota national guard in federal recognition and to obtain immediately \$22,000 allotment of government property.

General Wood said that the new and complete reports were mailed directly to General Mann, chief of the militia bureau, soon after Captain Rhinow left for the East. To make certain that the fund balance would be available for credit to the proper account he sent a draft for the amount, he said.

### Wife of German Envoy Dies.

Basel, Switzerland, June 29.—A Constantinople dispatch announces the death from typhus of Frau von Kuhlmann, wife of the German ambassador to Turkey. Dr. von Kuhlmann formerly was attached to the German embassy in Washington.

## WOMAN'S REALM

### HUBERT WOMEN'S CLUB ENTERTAINS

Mrs. E. W. Kaley entertained the Women's Club of Hubert on Wednesday, June 27th, about 25 ladies being present. Mrs. Henry I. Cohen and Mrs. Blake made short addresses and questions of public interest were discussed. A collection for Red Cross work netting \$8.90 was made. Refreshments were served and a very enjoyable afternoon was spent.

#### White-Stanley

A very beautiful and attractive wedding was celebrated on Saturday evening at the home of Mrs. Joe White when her daughter Evelyn, was given in marriage to Leslie F. Stanley. The beautiful ring service was used, Rev. Herbold being the officiating minister.

The vows were spoken under a beautiful constructed arch. Mrs. Dan Lyons played the wedding march and little Vivian Sauvageau of Duluth, was the ring bearer.

The parlors were handsomely decorated in pink and white. The bride was very charming in a gown of white silk and lace. She carried a bouquet of white carnations. The bridesmaid, Miss Esther Stanley, was prettily dressed in a pink silk and carried pink carnations. The best man was John Stanley.

After the ceremony the guests sat down to a sumptuous dinner.

The bridal party left for their new home at 316 North Tenth street, in a car nicely decorated for the occasion.

The happy couple received many beautiful and useful gifts.

The out-of-town guests were Mr. and Mrs. Sauvageau and daughter Vivian of Duluth, Miss Esther and Mabel Stanley from Sylvan. The guests were immediate relatives of the couple.

#### Tollefson-Law

Sam Gerald Tollefson and Miss Ruth Law were married at the home of the bride's sister and brother-in-law, Mr. and Mrs. S. T. Morrell, 1315 Lyons St., Des Moines, Iowa, Wednesday evening, June 27, at 7:30 o'clock.

The bridegroom is a son of Mr. and Mrs. Andrew Tollefson of Nokay Lake and a brother of Mrs. Wm. Garvey and Mrs. Wm. Herrman of this city.

The bride is the youngest daughter of Attorney B. Law of Minneapolis and is a charming young school teacher.

The newlyweds will make their home for the summer in one of Dickenson's cottages at Nokay lake.

The Dispatch joins their many friends in wishing them unmeasured happiness and prosperity.

#### Bible Class

The Bible Class of the Evangelical Sunday school will hold their monthly meeting on Tuesday evening at the home of Mr. and Mrs. S. Wooden, to which everybody is invited.

#### Child's Apron.

A child will not object to wearing an apron if it is attractive, but to be attractive does not mean that it necessarily has to be expensive. A very good looking model recently seen was made of blue checked gingham, cut kimono fashion with sleeves. The neck line was bound with blue braid, and the same trimmed the narrow cuffs into which the sleeves were gathered. Across the bottom of the apron there was applied a strip of white muslin, on which little Bopeep and her sheep were painted. This applied strip of muslin formed a sort of deep pocket. It could, however, be stitched down.

#### Crocheting Hint.

It is quite an effort to press the crocheting needle through a stiff edge of material. A good idea is to unthread your sewing machine and, using a heavy sewing machine needle, stitch around the edge, adjusting the length of the stitches to the requirements of the edge. The effect will be that of perforations through which the crocheting needle can be easily passed.

#### For Blonds.

For a blond nothing could be more effective than a bathing suit of apple green taffeta, collared and cuffed in white crepe de chine, and with green silk stockings and satin shoes matching exactly. The shoes should be laced in white. Purple is another shade beloved of the fashionable barber and is at its best with dainty white lingerie collar and cuffs.

#### Helps Asthma and Hay Fever

Now comes the season when hay fever and asthma cause thousands to suffer. "I have been troubled for years with asthma," writes E. C. Schaaf, Creston, O., "and find Foley's Kidney Pills the only thing that gives me relief. It loosens the phlegm so I can throw it off and then sleep." Contains no opiates. H. P. Dunn.—Adv.

### HAS A FINE MARKET GARDEN

Crosby, Minn., July 2—One of the finest gardens at Crosby is that of M. F. Crosby in which potatoes, corn, etc., are flourishing. The strawberry patch is a noteworthy, containing 2,000 Ever Bearing and 4,000 Standard.

For the cutworm trouble Mr. Crosby also recommended a flash light, a pan and a ladle. Making dope out of corn meal and Paris green killed the worms and killed the birds too, making it objectionable on that account.

### Save Sugar in Jelly Making

(By United Press)

Washington, D. C., July 2—Much waste of sugar and spoilage of jellies can be avoided by using a simple alcohol test recommended by the Bureau of Chemistry, United States Department of Agriculture. To determine how much sugar should be used with each kind of juice put a spoonful of juice in a glass and add to it one spoonful of 95 per cent grain alcohol, mixed by shaking the glass gently. Pour slowly from the glass, noting how the pectin—the substance in fruits which makes them jelly—is precipitated. If the pectin is precipitated as one lump a cup of sugar may be used for each cup of juice; if in several lumps the proportion of sugar must be reduced to approximately three-fourths the amount of the juice. If the pectin is not in lumps but is merely precipitated, the sugar should be one-half or less of the amount of the juice. If the juice shows no precipitation under this test, it is unsuitable for jelly making and must be combined with apples or other juices rich in pectin.

### FOR "FLAPPERS."

Interesting School Rig For This Same Girlish Age.

With a Scotch gingham plaid skirt cut kilt goes this charming Russian

MOTHER'S PRIDE.

blouse belted with wide black velvet ribbon. The slits give a vestee effect, and the front otherwise closes diagonally with two tone buttons.

#### Wool Grease.

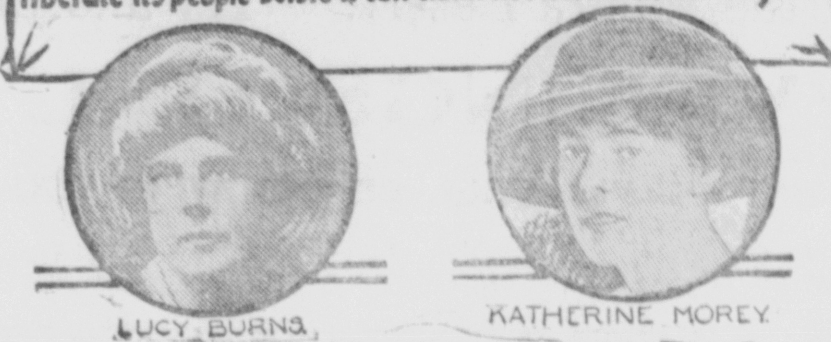

Wool grease is obtained by soaking the raw wool in water and washing with soap and carbonates of alkalies. The water is then passed into a centrifugal apparatus which removes the grease from the soapsuds.

### Straightened Him Up

Solomon Bequette, Flat River, Mo., writes: "Two years ago I was down on my back till I could hardly go. Foley Kidney Pills straightened me right up." Rheumatic pains, aching joints, sore and swollen muscles indicate deranged kidneys. Foley Kidney Pills get right at the trouble and give prompt relief. H. P. Dunn, druggist.—Adv.

### Two Suffragettes Who Were Arrested at White House Gates for Displaying This Banner

**TO THE ENVOYS OF RUSSIA.**  
President Wilson and Envoy Root are deceiving Russia.  
They say, "we are a democracy. Help us win a world war so that democracies may survive."  
We, the Women of America, tell you that America is not a democracy.  
Twenty million American Women are denied the right to vote.  
President Wilson is the chief opponent of their national enfranchisement.  
Help us make this nation really free. Tell our government that it must liberate its people before it can claim free Russia as an ally.

Miss Lucy Burns and Miss Katherine Morey, ardent followers of the Congressional Union in Washington, were arrested at the main entrance gate of the White House when they displayed this banner, which was construed by many as an insult to the president of the United States. They had been attacked the day before, and the banner was trailed in the dust.

Fair Dianas at the Traps

BY PETER P. CARNEY,

(Editor National Sports Syndicate)

Not many years ago women were conspicuous by their absence in trapshooting matters, but such is not the case today. Thus far eight states have held women's trapshooting championship events, as follows:

Chicago, Illinois, Mrs. A. H. Winkler.

Wilmington, Delaware, Miss H. D. Hammond.

Tulsa, Oklahoma, Miss M. Wilson.

Pittsburgh, Pennsylvania, Mrs. F. H. Mellon.

Los Angeles, California, and Nevada, Mrs. C. E. Groat.

Atlantic City, New Jersey, Mrs. F. A. Johnson.

Stamford, Connecticut, Mrs. F. F. Rogers.

Nichols, Iowa, Miss E. Wettleaf.

It will be a matter of a few years only when there will be a women's trapshooting championship event held in every state, the same as is held for men, and the women will have a little Grand American all their own. Trapshooting is an ideal sport for women and they should be encouraged in shooting at all tournaments.

The best score made by a woman in championship competition was by Mrs. Groat, in the California and Nevada shoot, when she broke 95 of the clay saucers.

These fair dianas and many more will be found in the Grand American

trapshooting tournament, which takes place at the South Shore Country club, Chicago, Ill., the third week in August. There will be special events for women in this tournament.

#### Spring Tints.

Japanese colors, dashing, splashing reds and yellows, with streaks of celestial blues, are the real tints for spring. Bright colors took a back seat last winter, some say on account of the lack of dyes. Whether the manufacturers can meet the spring decree for a Japanese riot of shades has not been announced. These oriental colors will be particularly noticeable in the spring ribbons. It is to be a ribbon season. Hats will be made entirely of ribbon ruffles, many of them in a new grayish green that is said to be having a wide swing in the Paris millinery salons.

#### Scotch Hash.

An onion cut fine and cooked a little in beef dripping, then add cooked meat that has been put through a meat chopper and a quarter as much fine crumbs of dried bread. Add salt and pepper and some gravy. If small amount add a little hot water after cooking awhile. Cook slowly half an hour or more, turning carefully to brown it all. This is very rich and is better made of cooked roast beef which is generally the poorest meat for hash. No potatoes in this hash.

#### Fashion Fancy.

Some amusing little tricks found in French dressmaking are used to get the effect of a barrel skirt. In a suit of reseda green homespun that has the sweater type of coat the skirt has a deep plait at the side pointing forward and caught in just below the knee with a short strap and buttons so as to give a slight barrel effect.

The oat cakes of Scotland are said to approach nearer the primitive type of bread than anything else known today.

"The Garden of Allah"

A pageant of life and love, a panorama of passion in the burning desert—where men and women, too, may love more fervently than in any other place—this is the message of the sublime photo-play creation of Robert Hichens' masterpiece, "The Garden of Allah," famous in play and book, but now hourly becoming more famous in the thousand screened, million-ed actioned picture.

Men love and shoot and stab fiery and quick in the desert—and blood runs hot at the bat of an eye-lash.

One of the telling bits of real life from the great picture is that of the interior of a ribald oriental dancing place. In this a fascinating dancer

### 2 GIRLS FOR PRESS AGENTS

Miss Miller and Miss Stella Kahn are With Al G. Barnes Wild Animal Circus

ARE BRIGHT AND AGGRESSIVE

Fully Demonstrated Their Ability and Originality and Now Permanently With Show

Two girl press agents are with the Al G. Barnes Wild Animal Show which comes to Brainerd Tuesday, July 31.

Miss Miller was with the show last year and followed a man press agent and so well did she perform her duties that she was made chief. Miss Kahn is no novice in the publicity game and together they make the only team of girl press agents boasted by any circus on the road.

Miss Miller will be in Brainerd on or about ten days before the show arrives and Miss Kahn will be here five days before.

The circus will appear on the grounds near the gas company site, Murray A. Pennock, general agent of the show, deeming that a better location than out on the dusty Oak street road.

### CARE OF MILK.

How to Keep Down Bacteria During Hot Weather and Illness.

Keep your milk bottles covered either with caps or by placing glasses over them. Keep them covered in the refrigerator and in the kitchen or dining room.

Never pour milk into an unsterilized bowl or pitcher. Scald all vessels into which milk is poured for keeping or serving. Cool these utensils after scalding before you put milk into them.

Before you open a bottle of milk wash and wipe the outside of the cap with water and a clean cloth. The little depression at the top of the bottle collects dust or water or milk, which may attract flies. Lift out the cap with a pointed instrument, so that the outside of the cap, which may be contaminated, will not be pushed down into the milk.

Clean and scald the refrigerator where milk is stored regularly with hot soda solution. See that the drip pipe is kept open and clean.

Even in the cleanest refrigerator never keep milk in an open vessel. Milk absorbs odors easily.

Finally clean empty bottles. Rinse thoroughly with cold water every milk bottle as soon as emptied and then wash with hot water. This helps your milkman to give you clean milk.

Never take milk bottles into a sick-room. If you have an infectious or contagious disease in your home boil the milk bottles and do not return them without the express sanction of your local health officer or attending physician.

#### What He Was Tired Of.

Every non-golfer and many golfers, too, will have hearty sympathy for the poor little caddy in this story from the New York Tribune. The golfer who was employing him was playing very badly, and the caddy lay down on the grass at one point and watched him.

When the man had got the ball out of the bunker he glanced toward the boy.

"You must be tired," he said, "lying down at this time of day."  
"I ain't tired of carrying," said the boy, "but I am tired of counting."

## SOLDIERS BREAK UP PARADE

Riot Follows Demonstration by Boston Socialists.

Boston, July 2.—Riotous scenes attended a Socialist parade here which was announced as a peace demonstration. The ranks of the marchers were broken up by self-organized squads of uniformed soldiers and sailors.

Red flags and banners bearing socialist mottoes were trampled on and literature and furnishings in the Socialist headquarters in Park Square were thrown into the street and burned.

Police reserves stopped the rioting after it had been in progress an hour and a half. Many arrests were made, including some participants in the hundreds of fist fights. Agents of the federal department of justice arrested a number who were alleged to have made upstair remarks. No soldier or sailor was arrested.

## ROBBERS KILL AND STEAL

Bandits Terrorize Russian Town After Holding Up Bank.

Petrograd, July 2.—Ten masked bandits, in the most approved Jesse James style, held up the Oceanic bank of Ust, terrorizing the town, stealing 100,000 roubles (about \$54,100) and a number of valuable documents.

Several townspeople were killed and wounded when the bandits went through the streets, demanding everybody's valuables.

The incident led to strongly repressive measures by the government to put down crime. All court procedure was practically made to conform to martial law. Under the new plan a jury may consist of three soldiers and even the prosecutor may be a member of the army.

## MEAT AND MONEY IN HOGS

Farmers of Nation Are Called Upon to Raise Pork.

Washington, June 26.—The praises of the hog as a meat producing animal are sung by the department of agriculture in an appeal to farmers to raise hogs, hogs and more hogs, as the quickest way of increasing the nation's meat supply.

"The hog is the most important animal to raise for meat and money," the statement says.

"He requires less labor, less equipment, less capital, makes greater gains per 100 pounds of concentrates and reproduces himself faster and in greater numbers than any other domestic animal."

"Very near 50 per cent of the total value of the meat and meat products slaughtered in the packing houses of the United States is derived from the hog."

### Scotland is Glad America Came In

NOTE—The following is the first of a series of three mail stories by Lowell Mellett, United Press Staff Correspondent—telling of war conditions as seen by him on a recent trip through Scotland.

By LOYELL MELLETT  
(United Press Staff Correspondent)  
Edinburgh, June 10 (By Mail)—Scotland is glad America came in. Edinburgh proved it today to a group of peripatetic newspaper men.

The newspapermen, stopping in Scotland's capital en route to the British cruiser fleet, received a welcome that could scarcely have been exceeded had their number included President Wilson and Andrew Carnegie. They were vastly bewildered for awhile but the meaning became clear in time. Scotland has been greatly thrilled by the action of the United States and today's humble visitors offered the first opportunity for a real celebration.

This accounted for the bringing forth of the American flag. It accounted for the laboratory arranged—though simply menueed—banquet, with the Lord Provost of Edinburgh presiding and the Lord Chief Justice of Scotland speaking and every dignitary the state banqueting hall would hold occupying a place at the table. It explained the serious session of the magistrates on the question of whether the dinner should be wet or dry, a question that finally was settled in the manner it was though would be most pleasing to the visitors.

A committee of municipal magistrates themselves took the newspaper men in tow, led them to the top-most of Edinburgh castles and the innermost sanctum of Holyrood palace. And local newspapermen accompanied to record the impressions of "the distinguished American journalists."

Everything partook of the nature of a peace-time holiday, rather than serious war-time business, an illusion easily achieved in Scotland where the war has meant actual prosperity. Instead of the reverse, desolation has been brought to thousands of homes but there is no other material evidence of the war, save for killed Highland soldiers in the streets and occasional blue uniforms of convalescents sitting in the sunny parks.

Growing grass and moss have hidden the slight scar on one facade of Edinburgh castle, the mark of a Zeppelin bomb dropped early in the war. The castle still imprisons from time to time German prisoners brought in by naval vessels. Whether Admiral Von Tirpitz's son is still held there the cannies hosts did not say, but admitted that had the bomb which glanced off the castle been true to its purpose there would have been mourning at the fireside of the arch exponent of terrorism.

This is presuming that Admiral Von Tirpitz knows what most Germans apparently do not, that the Zeppelin attack on the castle failed. Many prisoners brought there refuse to believe they are in Edinburgh castle, insisting that it has been destroyed.

Edinburgh had little else to show of war's effect, but a great deal to show of her gratitude toward America. She made this plain in so many ways that when the unlucky correspondent called on to respond to the toast "Our American Guests" felt the necessity to establish his own connection with this hospitable country. He was compelled to refer to a Scot-

tish forbear who departed America—ward only a few jumps ahead of a Scottish sheriff.

The closeness of the relations between Scotland and America was emphasized again and again at the evening reception. One Edinburgher after another asked for information concerning relatives in various parts of the United States whom he thought some of the visitors might know.

And when the speeches had been made and the toasts to the King and the President drunk and the functionary in sacred robes had led the three "hip, hip, hoorays," that apparently constituted his principal official duty, the city and state dignitaries clasped hands with their guests around the table and sang a song worth going all the way to Edinburgh to hear:

"Will ye noo coom again?"

### A Bad Spring for Women

The late, cold and damp spring seems to have caused much suffering from backache, rheumatic pains, aches and pains in sides, joints and muscles, lumbago and similar ailments. Mrs. T. J. Bucknell, Hardy, Neb., writes: "I am recovering from an attack of lumbago by the aid of Foley Kidney Pills. They surely help me." H. P. Dunn, druggist, Advt.

### REVENUE BILL IS READY IN SENATE

Estimated Measure Will Raise \$6,652,170,000.

### TAKES HEAVY PROFITS TOLL

Finance Committee Completes Several Changes—La Follette's Substitute Bill Has Little Chance of Adoption. Revenue From Mails Is Cut Down.

Washington, July 2.—The senate finance committee has completed its draft of the war revenue bill, and the measure in all probability will be reported to the senate by Chairman F. M. Simmons. The committee has had the measure before it since May 22.

As altered by the committee, it is estimated that the bill will raise \$1,652,170,000. The house bill would raise about \$1,800,000,000. The committee determined that it would not add any bond issue provision to the bill. If a bond issue is required, congress will be in session again, it was held, in time to provide it.

Many radical changes have been made in the house measure by the senate committee, particularly in regard to the excess profits tax. It was estimated that the senate excess profits tax will raise \$305,000,000 more than the house bill.

The house rate on excess profits was proposed at 16 per cent, double the present rate. The senate committee, in addition to the increase on excess profits, now to be extended to individuals, substituted a new plan of nominal prewar profits, upon which excess profits levies will be made.

### Revenue From Mails Cut Down.

Under the committee bill the estimated increase in revenue from first class mail matter has been reduced from \$70,000,000 to \$50,000,000; from second class mail matter, \$19,000,000 to \$3,000,000.

The senate bill has placed a tax of 5 per cent on the net profits of newspapers and magazines, and provides an increase of a quarter of a cent a pound on second class mail matter, doing away with the zone system and increases in the second class mail matter carried in the house bill. It has provided that parcel post packages shall pay a tax as well as express packages.

A final meeting of the committee is set for today. Senator La Follette will offer his substitute for the entire bill, but this will be voted down. How soon the revenue bill will be taken up in the senate depends upon the passage of the food control bill which has the right of way. Once it is laid before the senate it is estimated that it will take several weeks to pass it.

### WRONG FEEDING METHODS.

[National Crop Improvement Service.] There is an old story about a ship captain who had a medicine chest. A sailor was sick and he found that No. 47 in his book was the indicated remedy, but alas! the bottle of No. 47 was empty, so he took equal parts of No. 40, which was strychnine, and No. 7, which was carbolic acid, and added them together and made No. 47—and the sailor died.

The application of this old story is that many a feeder will think that if a little of cottonseed or oilseed meal is good, a whole lot will be better. And, like the man who put the green spectacles on the horse and fed him shavings—just after he got him trained the horse died.

It is human nature to experiment in feeds, and the poor cow has to suffer for an overdose or an underdose before the proper ration is established.

### GENERAL BRUSILOFF.

Russian Commander Begins New Drive Along the Lemberg Front.

### HSUN TUNG DECLARES HIMSELF NEW RULER

London, July 2.—General Chang Hsun, a Reuter's dispatch from Peking says, has informed President Li Yuan Hung that he must retire because the Manchurian emperor, Hsun Tung, has been restored to the throne.

Another Reuter's dispatch from Peking says that Hsun Tung issued a mandate Saturday morning announcing his succession to the throne of China.

Hsun Tung, the son of Prince Chun, ascended the throne of China, Dec. 2, 1908, under the regency of his father. On Dec. 6, 1911, Prince Chun abdicated as regent and Feb. 12, 1912, the youthful emperor abdicated the throne and the Chinese republic was established. Since that time the emperor had virtually been a prisoner of Presidents Luan and Li.

### Phosphorescent Skunks.

Patrick Brennan of Phoenix, Ariz., writes to the Scientific American: "The large black, the black and white and the hydrophobic skunks are phosphorescent in darkness, giving off a continuous blue flame, the head being of a more fiery red, then tapering off into blue to the tail tip. This fact may answer in a degree for the blue marsh flame, the Jack-o'-lantern and the lantern of the southern states and the night ghost lights of all states. I make this suggestion from my experience in trapping in deserted mine tunnels in this state."

### Great Britain's Great Seal.

Measuring six inches in diameter and made of silver, the great seal of Great Britain is kept in the custody of the lord high chancellor, and a new one is prepared for each reign.

### Machine Protection is Very Important This Year

Machine manufacturers state that enough steel for about 75 per cent of the NORMAL machine demand is all they can figure on this year.

The demand for machines, due to big prospective crops, is almost sure to be away above normal with a possibility of the machine companies being unable to deliver.

### Save Your Present Machines

by building a shed for them where you can keep them in good condition and protect them from rust and rot.

The shed will surely cost you less than new machines or extensive repairs, and as new machines are not available this season a shed may save part of your crops. See us now for the material for such a shed while the MATERIAL can be had.

### Winnor-Adams Lumber Co.

### PRINTERS' INK

Has done more towards nursing a sick or stagnant business than any known remedy. To get the desired results one should learn the real value of this great commodity and its relative merits when employed in the right way.

### THE AVERAGE REFORMER.

[National Crop Improvement Service.]

The average reformer having so little at stake himself, plunges about like a bull in a china shop, regardless of the results of his ardor.

An amusing incident is told of the Secretary of Commerce. The can manufacturers put up a howl that unless they could get tin-plate to make up, no canning of fruits and vegetables could be done, so without looking over the field it is said that an order was made that steel was to be diverted by the manufacturers from other projects and put at the disposal of the can manufacturers. It looked all right on the face of it, but when the manufacturers of harvesting machinery demanded steel which they contracted for, and found that there was not steel for aprons, it having been diverted to cans, a hurry-up call modifying the order was issued, so that our harvesting machines could be made in time for the growing crop.

This illustrates how many plans are ignorantly made robbing Peter to pay Paul. Every enthusiast who has a pet reform which is always hitting some other business instead of his own, never looks around to see what the effect will be before he plunges. The manufacturers of feed and the most successful feeders in the country have a right to demand that that delicate machine—the dairy cow—shall not be wrecked by hasty legislation.

Revolutionary reforms are seldom efficacious. Anything which disturbs the food equilibrium should be handled gradually. Experience has shown that the most efficient way to handle cereal products is to remove the human food first and feed the residue to stock. Any other system is sheer extravagance.

## Building the Robins' Nest.

It is interesting to watch a pair of robins when they start their house-keeping. Together they build the nest or remodel one that they have occu- pied for several seasons. In the latter case the old leaves are cleared out and a few crooked sticks added to the clumsy looking mass. Then it is ready for the mud cup that will make it firm, solid and safe. The mother bird brings the mud and uses her breast as a ma- son does his trowel to shape, smooth and press it into shape. She is a very dirty bird when she has finished, but soon makes herself clean and neat again. When lined with grass, moss and feathers the nest is quite comfort- able.

ch of it. occurred to me that I had not until last night. I happened to occur I overheard a conversation which was very much a graph.

## RUSSIANS STORM TEUTON TRENCHES

General Brusiloff Makes Drive Near Lemberg.

## RUSS ATTACK IN THE NIGHT

Berlin Asserts Attacking Troops Were Forced to Retire — Offensive Preceded by Intensive Artillery Fire Over 175-Mile Line—Verdun Battle Continues.

London, July 2.—The soldiers of new Russia under General Brusiloff have assumed the aggressive for the first time since the revolution. Russian troops have begun an attack on an extensive scale. Along a front of eighteen and one-half miles in the region of Brzezany, Galicia, Russian troops have stormed German positions. Berlin says the Russians suffered heavy losses and were compelled to retire.

The attack was made between the Upper Stripa and the Narayuka river, southeast of Lemberg, where the artillery firing has been heavy recently. The fighting is in the region where the Russians won such a signal success a year ago.

The Russians also made night attacks on both sides of Brzezany and near Zyzyn, and Berlin reports as- saults between Zlota Lipa and the Narayuka have brought on new battles.

## Artillery in Fierce Duel.

The Russian artillery has been ac- tive and from the Berlin report it is learned an intense duel has been in progress from the region of Brzezany to as far northward as the middle of Stakhod in Volhynia, a distance of about 175 miles.

Berlin declares that the Russian at- tacks, which it says were powerful, were brought about through the pres- sure of the leading entente powers.

Field Marshal Haig continues to tighten his grip on Lens. On the north bank of the River Souchez British troops have captured German posi- tions on a front of half a mile south- east and west of Lens.

The French and Germans continue to battle at various points from Cerny to the Verdun region. East of the Cerny the French have repulsed German attacks and in the region of Prunay, east of Rheims, a German surprise at- tack was thrown back with heavy losses.

## 8,000 AUSTRIANS DIE IN FRUITLESS ATTACK

Rome, July 2.—At least 8,000 Aus- trians succumbed in the fruitless en- emy offensive around Mount Ortigara, according to war office estimates.

The battles for this dominating point set a new mark in ferocity. The Austrians attacked in suc- cessive waves with every known device of killing, big guns, little guns, ma- chine guns, liquid fire, flame projec- tors, asphyxiating gas, mines and bombs.

The ground was literally churned into powder and soaked with the blood of the fighters.

Today neither side holds Ortigara. The barrage waves of both the Italian and Austrian forces converge over its summit, making it impossible for any human being to live through the rain of shells.

## YANKEES FIRE ON DIVERS

American Liner Gun Crew Attacks German U-Boats.

London, July 2.—The gun crew of an American liner fired on two Ger- man submarines on the voyage from the United States to England. Both targets were at a considerable range, but the report to Washington of the commanding officer will express the belief one periscope was shattered.

A third submarine was sighted, but at a great distance, and it submerged immediately.

## KILLS SELF AND CHILDREN

St. Paul Mother Turns on Gas to Ac- complish End.

St. Paul, July 2.—Unable to stand longer the alleged beatings of her hus- band and fearful that her children would be subjected to the same treat- ment, Mrs. Joseph Komarek, thirty- four years old, gave her three little ones a bath, put on their nightgowns and went to bed with them after turning on the gas.

Mrs. Komarek and her little daugh- ter, Annie, eight months old, and sons, James, two years old, and Joseph, three years old, are dead. Joseph died on the way to the city hospital.

## Movie Fire Rout Hotel Guests.

Chicago, July 2.—An explosion in the storage vaults of a moving picture concern in a downtown office building before daylight caused a spectacular fire that terrified guests of four hotels and caused many of them to rush, partly dressed, from their rooms. About 4,500 feet of film was destroyed.

## Expert Advice For the Automobile Owner

Queries and Replies Covering Matters of Importance to the Man Who Runs a Car

I have recently noticed a jump in my car when I open the throttle with a load on the engine. It seems as though the clutch slips out and in again, grab- bing suddenly and producing the jump. Can you advise me regarding this?

The diagnosis which you have made of your own case seems to fit the evi- dence you have given regarding the action of your car. The clutch does not slip out, however, but remains en- gaged when occurrences such as you have noted take place. What actually happens is that the surface of the clutch is in such a condition that the frictional resistance is not sufficient to hold the load. If you have a leather faced cone clutch the chances are that the leather has become dry and after allowing the clutch to slip for a length of time in this condition the face of the leather assumes a hard glaze, which prevents it from taking hold as it should. If this trouble has gone too far the only repair is to replace the leather facing. On the other hand, if it has just started to develop you may save the leather by thoroughly satu- rating it with neatfoot oil or castor oil. This will soften the leather and give it the easy engagement with the firm holding power that is the natural prerogative of cone clutches.

With some cone clutches there is a tendency on account of the thinness of the material or carelessness in placing it on the cone, for the copper heads of the rivets to project through the leath- er. The result is that the copper bears against the cast iron flywheel and causes a slipping action, since the co- efficient of friction between copper and iron is not high enough to withstand the load of propulsion with only the pressure of the clutch spring to hold it engaged. Therefore, should your clutch be a cone, it would be well to examine the surface of the leather to see, first, if the rivets are properly countersunk; second, to see if the leather is not glazed and dry, and, third, to see that the leather is not worn out. If the latter is the case the only remedy is to replace it.

If the clutch is a disk design, intend- ed to run in oil, the slipping may be due to the accumulation of grease be- tween the plates. The remedy for this is naturally to employ some solvent or something which will cut the grease from between the plates. Kerosene is generally used for this purpose. The method of applying the kerosene will depend upon how the clutch is assem- bled and housed. If there is an acces- sible cover plate the kerosene can gen- erally be poured down through this and the motor run awhile with the gears in neutral. This will cause the grease to be washed out. Afterward

the kerosene is drained and the lubri- cant renewed.

A mistake very often made by own- ers of cars which have a disk clutch housed with the gear box is in placing heavy grease in the gears, forgetting that this will work its way between the plates of the clutch. When this is done the clutch very soon begins to slip.

The engine of my car runs well when it is working under a load, but when it is idle it only runs on two cylinders, Nos. 1 and 4. What can be the trouble? The car is a 1913 model.

The trouble undoubtedly lies in the fact that when idle the gas generated does not reach the far cylinders. This is probably due to the present low grade of gasoline for the handling of which provision was not made when your car was built. A new and modern carburetor equipment designed especially for low grade gas and this combined with a good hot air attach- ment to the air intake will give you a better running motor.

Of what value or merit are the tire saving jacks?

The value lies in their purpose. They are tire saving jacks, and they do save the tires. Where a tire is supporting the weight of a car it is under strain. You would not care to have a person stand on your foot for a time any longer than was absolutely necessary. So with tires. When it is not neces- sary that they bear the strain of the car the tire saver comes in and an- swers a good purpose in prolonging the life of this rather expensive equipment.

Will you please tell me the advantage of wire wheels?

Wire wheels give a car a snappy ap- pearance. They are more resilient than wood wheels, effecting a saving on tires. They will stand greater strain than wood wheels in case of ac- cident or severe driving. They are lighter than wood wheels, thus reduc- ing the amount of unsprung weight.

What is a good flux for welding alu- minum by the acetylene process?

It makes a great difference whether you are welding sheet aluminum or cast aluminum what flux you should use. Zinc chloride is used quite fre- quently, but the best satisfaction can be secured by purchasing from the large welding concerns the proper flux. These are secret formulas which have been worked out by the chemists of these concerns, and, while you will have to pay a little more for them, the better results justify their use.

## U. S. CONTROL IS ONLY HOPE

Secretary Baker Causes Upset in Coal Price Agreement.

Washington, July 2.—Unless con- gress provides outright federal con- trol of coal production and prices at once the consumer will be the victim of Secretary Baker's repudiation of the \$3 a ton minimum price for soft coal at the mines agreed on last week by coal operators in conference here with the coal production committee of the Council of National Defense.

The voluntary agreement was to have become effective July 1, but Sec- retary Baker's letter calling the price "exorbitant, unjust and oppressive" is regarded as assurance the opera- tors will not attempt to enforce it.

Attorney General Gregory is under- stood to be ready to begin prosecution of the operators under the anti-trust law if the agreement is carried out.

Administration circles were much upset over Secretary Baker's letter, which was written as president of the Council of National Defense, to W. S. Gifford, director of that body. The letter revealed a lack of co-operation and harmony among the various ad- ministration agencies including the cabinet.

## NEGRO MOB FIRES ON POLICE

East St. Louis Blacks Kill and Injure Officers.

East St. Louis, Ill., July 2.—More than 200 rioting negroes in East St. Louis, every man armed with a rifle or revolver, virtually took possession of the "Black Belt," killed one policeman and seriously wounded others.

Without a word of warning, the ne- groes opened fire on a police depart- ment automobile in which the officers were riding and raked the car with bullets.

When Detective Sergeant Coppedge inquired as to the cause of the trouble he was met with a curt reply and an order to "drive on." As the machine started to move the negroes opened fire, killing Coppedge instantly.

## Twenty-seven Autos Burn.

Chicago, July 2.—Twenty-seven mo- tor cars, many of expensive manu- facture, were destroyed by fire in Arrow garage. The loss, including that to the structure, was \$100,000. The fire started from an explosion in the gaso- line supply tank.

## ROOT ASSIGNED TO TREMENDOUS TASK

Job of Keeping Russia In Line Almost Impossible.

## TIME AND TACT REQUIRED

His Work More Important Than That of Any of Our Military or Naval Chiefs—Many Representatives Who Voted For Food Bill Just Took Chances—Always Trouble In Senate.

By ARTHUR W. DUNN.

Washington, July 2.—[Special.]—Elihu Root was assigned the most diffi- cult job of the war.

General Pershing when he enters the actual fighting will have a sector of four miles to defend and over which to advance when the time comes for pushing forward.

Admiral Mayo has command of the Atlantic fleet, but it is not expected that the great force under his com- mand will have any serious work to do for a long time to come. Admiral Caperton, with the former Pacific fleet, will patrol South American waters in the Atlantic. Admiral Knight will watch the situation in Asia. Vice Ad- miral Sims will be kept busy and has the most important naval command of any United States officer.

The time may come when all these officers will have something to do which may be the turning point of the war. But at present their duties are small compared with the work of Mr. Root.

## Almost Impossible Task.

It may be considered a compliment to Root that he was selected for this almost impossible task. He has gone to a country where the people are little understood, where the people have been held in subjection by autocratic rule for centuries, where they are bursting the bonds and are careless of what be- comes of their nation so that they get the food, money and privileges they have been clamoring for.

If Root succeeds it will be almost a miracle. With the present disturbed condition and new elements coming forth and making demands impossible to grant, there is really little hope that Russia can be welded into the solid mass necessary to make her a suc- cessful factor in the great war.

## Suggestion by Sims.

Congressman Sims of Tennessee made a suggestion which may have to be accepted before the war comes to an end. He told the house: "Ever since the Germans sent a merchant submarine to this country with a cargo and took a return cargo back to Ger- many it has seemed to me the subma- rine menace to transporting food and munitions was solved. If we can build submarine freighters which can carry food and munitions to England, France and Italy we will have solved the difficulty, so far as supplying the allies is concerned."

## Jarred Preconceived Conceptions.

In voting for the food control bill Congressman Mondell no doubt did as a good many others—took chances. At least this is the way he explained his position: "I am heartily in favor of this bill. It has required some shifting of view, some jarring of preconceived notions, to reach the point where I can accept this sort of thing; but, having reached the point, there is no halfway station."

The large vote for the bill showed that many other members of congress accepted the Mondell view in casting their votes.

## Trouble in the Senate.

Any way you fix it there is trouble in the senate. Senators do not like to talk to empty space, and yet if there is a call for a quorum and the sena- tors come back from the cloak rooms and committee rooms to the floor they resume their conversations, and there is so much confusion that the senator who is speaking cannot be heard.

In this connection an incident hap- pened while Senator Sherman of Illi- nois was talking. Harding of Ohio interrupted him.

"Would it be in order," he inquired, "to ask for a suspension of conversa- tion in the chamber?"

"It is in order," responded Vice Pres- ident Marshall, "but it seems to be in vain."

"I will make myself heard here in spite of the noise in this body," asserted Sherman. "I have had much more tumultuous bodies to address before and have made them hear."

## Gets Respectful Hearing.

Whether it is deference to his age, his long service or the fact that he was speaker for eight years, it is a fact that the house is very courteous to Uncle Joe Cannon. He never gets turned down when he wants to talk. During the consideration of the food bill he asked to be excused from talk- ing to empty benches, and he was granted the privilege of making his speech under the five minute rule when there was a large attendance. And the members give him a respectful hearing when he speaks.

## An Important Bill.

"This is the most important bill ever before congress," asserted a member one day.

"Does the absence of members sug- gest that is true?" inquired Uncle Joe Cannon, pointing to the twenty men scattered about the chamber.

## BONE DRY LAW IN EFFECT

Reed Amendment Prohibiting Ship- ment of Liquor in Operation.

Washington, July 2.—Twenty-three states became bone dry after midnight Saturday, the effective hour of the Reed amendment prohibiting shipment of liquor into any territory where its manufacture or sale is prohibited.

Eleven other states are partly af- fected by the legislation, which has been hailed by temperance advocates as the greatest single step toward abolition of the liquor traffic in the nation's history.

The law bars from prohibition areas, whether states or smaller corpora- tions, all mail matter containing ad- vertisements or solicitations for or- ders for intoxicants, a provision de- signed to aid in enforcing the anti- shipment feature by suppressing the activities of mail order houses in dry territory.

## SUSPECTS JAILED IN MISSOURI EPIDEMIC

St. Louis, July 2.—Two men are under arrest at Kennett, Mo., in con- nection with the deaths of sixty-two children from enterocolitis in Scott and Dunklin counties.

The men are held on prohibitive bail, with bond, in case bail should be offered, subject to approval by government officials in Washington before they can be released, it is said.

Government agents from Washing- ton and St. Louis are said to have gone to Kennett, where they are con- ducting a rigid investigation.

Eight more deaths from enterocolitis are reported from various parts of Scott county.

## ARMY IS 50,000 MEN SHORT

President's Call for Volunteers Falls of Its Purpose.

Washington, July 2.—President Wil- son's call for volunteers to bring the regular army up to its full war strength of 300,000 men by July 1 has not been realized. War department figures indicate that there still is a shortage of 50,000 men. This discrepancy probably will be relieved by taking reservists from the ranks of the new selective army.

With "recruiting week" at an end only nine states have furnished the complete quotas required. They are Nevada, Idaho, Illinois, Indiana, Mich- igan, Montana, Oregon, Utah and Wyoming.

## BIG WARSHIP IS LAUNCHED

Superdreadnought Idaho Takes to the Water.

Camden, N. J., July 2.—Another monster fighting machine for the navy took the water here from the yards of the New York Shipbuilding com- pany when the superdreadnought Idaho, sister ship to the Pennsylvania, flagship of the Atlantic fleet, was suc- cessfully launched.

Henrietta Simmons, granddaughter of Governor Alexander of Idaho, was sponsor for the big ship, and because of war conditions the general public was not admitted to the ceremony, which was witnessed by a small group of navy, congressional and company officials.

## Vacation Appetites and Summer Visitors

That's what Sum- mer means to you, doesn't it? Doesn't sound like much of a vacation for you. That is if you have to spend the time in an over- heated kitchen bending over a hot range; in other words if you haven't

## A New Perfection Oil Cook Stove

Get one!

You will have instant heat. Just touch a match to the wick and have something ready in a twinkling. Quick heat and dependable. No waiting.

You will have clean pots and pans. (The flame cannot touch them, the long blue chimney pre- vents that). You will have a cool kitchen.

You will have no ashes; no dirt; no odor; no smoke. You will have a hot or slow fire. Even burning. No need of watching. You will save one-third your fuel bill. Get a new Perfection Oil Cook Stove. Look for the triangle trade-mark. Easy to light, easy to fill, easy to rewick. Write for booklet giving full description and prices of the various types of stoves.

Standard Oil Company (Indiana) 101 72 W. Adams St., Chicago, U.S.A. For best results use Perfection Oil

## TIME TO BUY
